All rates of return presented in this report for time periods greater than one year are annualized. Mutual fund rates of return are provided by Morningstar. Rates of return for the North Shore Savings Fund and the Stable Value Fund are provided by the investment manager. All rates of return contained in this report are net of investment management fees. Percentages in some exhibits may not add to 100% because of rounding.

OVERVIEW

MAJOR MARKET RETURNS

	Third Quarter	Year-To-Date	1 Year Ending 9/30/07	3 Years Ending 9/30/07	5 Years Ending 9/30/07	10 Years Ending 9/30/07
Dow Jones Wilshire 5000 Index	1.5 %	9.1 %	17.0 %	14.0 %	16.5 %	6.8 %
MSCI All-Country World Ex-US Free	4.6	17.4	30.5	26.0	25.8	8.8
MSCI EAFE Free	2.2	13.2	24.9	23.2	23.6	8.0
MSCI Emerging Markets	14.4	34.5	58.2	40.8	38.7	11.6
MSCI All Country World Index	3.5	13.7	24.0	19.6	20.5	7.3
Lehman Brothers Aggregate Bond Index	2.8	3.8	5.1	3.9	4.1	6.0

The broad U.S. equity market overcame a volatile end of the summer to post a gain for the third quarter of 2007. The market was shaken during the collapse of the sub-prime market and the lack of liquidity in the credit markets during July and the beginning of August, but showed its resilience during September as it came back strong, gaining 3.6% during the month. The market also rallied off a 50 point basis point reduction in the Federal Funds rate on September 18th, which was the first rate reduction in four years. Fueled by a higher than generally expected cut to the Federal Funds rate, the market ended the quarter on a positive note, though questions remain regarding what lingering effects the sub-prime market collapse, and continuing decline in the housing market, will have in the near future.

The Dow Jones Wilshire 5000 Index gained 1.5% during the third quarter and posted a 9.1% gain year-to-date. Energy was once again the best-performing sector advancing 8.2% during the quarter, and has now gained 28.3% over the year-to-date period. Consumer durables was the worst performing sector during the quarter, declining 8.6%, while financial stocks, hurt by the sub-prime crisis, declined 3.7%. The financial sector declined 4.6% over the year-to-date period, making it the worst performing sector over the last nine months. Over the past quarter and year-to-date period, large cap stocks outperformed their small cap stocks, and growth outperformed value.

Non-U.S. stocks produced solid gains for the quarter as the MSCI All Country World ex-U.S. Index advanced 4.6%, and has now gained 17.4% year-to-date. Emerging markets led the way as the Asian region advanced 19.0% during the quarter, while Japan once again lagged the index declining 0.9%. Emerging markets held up well during the sub-prime crisis that began in developed markets. After a rough end of July and early August, the MSCI Emerging Markets Index rallied to end the quarter at an all-time high. The MSCI Emerging Markets Index produced stellar returns, advancing 14.4% during the quarter and has now gained 34.5% over the year-to-date period.

The U.S. bond market, as measured by the Lehman Brothers Aggregate Bond Index, gained 2.8% during the quarter and 3.8% year-to-date. Volatility returned to the fixed income market in the form of the sub-prime panic that started in mid-July. Investment grade and high yield corporate bond spreads widened significantly and those sectors lagged the broad market as investors re-priced risk across global asset classes. Government bonds outperformed the broad market, as investors sought a flight to quality under such market conditions. The yield curve declined and steepened during the quarter. The Fed met in September and decided to lower the Federal Funds rate by 50 basis points to 4.75%. Their decision quelled fears of a pending liquidity crisis resulting from the sub-prime panic.

**RETURN SUMMARY
ENDING 9/30/07**

	Third Quarter	Year-To-Date	1 Year Ending 9/30/07	3 Years Ending 9/30/07	5 Years Ending 9/30/07
North Shore Savings Fund	0.9%	2.8%	3.8%	3.3%	2.5%
iMoney Net Money Fund Average	1.2	3.6	4.8	3.1	2.2

Investment Strategy

The objective of the North Shore Savings Fund is to preserve capital and provide current income, while maintaining a high level of liquidity. The fund is FDIC insured.

Performance Commentary

The fund's short-term instruments continued to provide stability for investors.

The fund trailed the return of the iMoneyNet Money Fund Average during the second quarter, year-to-date and one-year periods, but exceeded the return of the Average over the trailing three and five-year periods. The fund has met its investment objective of providing participants with a high level of liquidity and capital preservation.

RETURN SUMMARY ENDING 9/30/07

	Third Quarter	Year-To-Date	1 Year Ending 9/30/07	3 Years Ending 9/30/07	5 Years Ending 9/30/07
Stable Value Fund	1.2 %	3.6 %	4.8 %	4.7 %	4.5 %
EnnisKnupp GIC Index	1.1	3.4	4.5	4.1	4.1

Investment Strategy

The Stable Value Fund managed by Great-West seeks to provide a stable rate of return through current income while preserving capital. The Fund invests solely in fixed income securities rated AAA or those issued by the U.S. government and its agencies. The Fund will allocate assets to sectors that management believes offer increased yield potential.

Performance Commentary

The Stable Value Fund exceeded the return of its benchmark during the quarter and over the longer-term periods shown above. As shown below, Great-West's annual performance has been favorable relative to the benchmark since inception.

**RETURN SUMMARY
ENDING 9/30/07**

	Third Quarter	Year-To-Date	1 Year Ending 9/30/07	3 Years Ending 9/30/07	5 Years Ending 9/30/07
PIMCO Total Return Fund Instl	4.6 %	4.9 %	5.8 %	4.2 %	4.8 %
LB Aggregate Bond Index	2.8	3.8	5.1	3.9	4.1

Investment Strategy

The PIMCO Total Return Fund, Institutional Shares, seeks total return consistent with preservation of capital. The Fund's strategy includes active sector rotation and moderate interest-rate anticipation. PIMCO's objective is to outperform the Lehman Brothers Aggregate Bond Index without incurring greater risk by utilizing innovative investment techniques or identifying sector and issue buying opportunities. The Fund maintains a duration between 3 and 6 years and can invest up to 10% in issues rated below BBB but no lower than B. The Fund may invest up to 20% of assets in non-dollar bonds. In March of 2007, PIMCO's Institutional share class replaced the Administrative share class.

Performance Commentary

The PIMCO Total Return Fund returned 4.6% during the third quarter, exceeding the LB Aggregate Bond Index by 1.8 percentage points. The largest contributor of excess returns was the manager's curve steepening position, which fared particularly well given that the Fed eased rates in September by 50 basis points versus the market expectation of 25 basis points. Tactical allocations to corporate credit and a longer-than-benchmark duration position also added to relative performance. Non-dollar securities and currency positions provided excess returns despite marginal underperformance by EMD. An overweight to mortgages, which underperformed Treasuries, detracted from relative performance but security selection of agency pass-throughs neutralized this. PIMCO's subprime exposure of 1.7%, which remains unaffected by troubles in the sector, is limited to AAA-rated, one year or less maturity, senior ABS with approximately 40% credit support.

The Fund's longer-term performance remained favorable relative to that of the benchmark.

Investment Strategy

T. Rowe Price Personal Strategy Income Fund seeks to provide income, with a secondary goal of capital appreciation. The Fund invests in a variety of both stocks and bonds, with an emphasis on dividend-paying stocks and government and high-quality corporate, income-producing bonds.

The Fund's target asset allocation is 40% stocks, 40% bonds, and 20% cash. Typically, the Fund maintains a 5% - 10% exposure to non-U.S. stocks. It is the most conservative of the three T. Rowe Price lifestyle funds.

Performance Commentary

The T. Rowe Price Personal Strategy Income Fund outperformed its benchmark by 20 basis points during the third quarter. In comparison to the custom benchmark, the Fund had an overweight allocation to stocks and an underweight allocation to cash which provided a significant boost in performance. A large-cap bias contributed to excess returns, especially the Fund's overweight to large-cap growth stocks as growth outperformed value for the quarter. In addition, the Fund increased its allocation to non-U.S. stocks by 3.0 percentage points which helped performance. The manager noted that the Fund's high-yield bond exposure was favorable to results.

The Fund's longer-term performance remains favorable relative to the benchmark.

Investment Strategy

T. Rowe Price Personal Strategy Balanced Fund seeks both capital appreciation and income. The Fund invests in a variety of both stocks and bonds, with an emphasis on blue-chip, dividend-paying stocks, government and high-quality corporate, income-producing bonds.

The Fund's neutral asset allocation is 60% stocks, 30% bonds, and 10% cash. Typically, the Fund maintains a 10% exposure to non-U.S. stocks. The balanced fund is the median of the three T. Rowe Price lifestyle funds in terms of expected risk and reward.

Performance Commentary

The T. Rowe Price Personal Strategy Balanced Fund outperformed its benchmark by 0.2 percentage points during the third quarter. The Fund's overweight allocation to non-U.S. stocks provided a significant boost to returns in addition to its underweight allocation to cash relative to its custom benchmark. Within the equity portion of the Fund, a bias toward large-cap helped, as did a growth bias as growth outperformed value. In addition, the Fund increased its allocation to non-U.S. stocks by 4.7 percentage points which helped performance. The manager noted that the Fund's high-yield bond exposure was favorable to results.

The longer-term performance of the Fund remains favorable relative to that of the benchmark.

Investment Strategy

T. Rowe Price Personal Strategy Growth Fund seeks capital appreciation, with a secondary goal of income. The Fund invests in a variety of both stocks and bonds, with an emphasis on blue-chip, dividend-paying stocks, government and high-quality corporate, and income-producing bonds.

The Fund's neutral asset allocation is 80% stocks and 20% bonds. Typically, the Fund maintains a 15% - 25% exposure to non-U.S. stocks. The growth fund has the highest expected risk/reward profile of the three T. Rowe Price lifestyle funds.

Performance Commentary

The T. Rowe Price Personal Strategy Growth Fund outperformed the custom benchmark during the third quarter by 0.1 percentage points. An overweight to stocks and underweight to bonds benefited the Fund. An underweight allocation to the financial sector added returns as well. The Fund's large cap growth bias was a positive as growth stocks outperformed value stocks. The manager noted that the Fund's high-yield bond exposure was favorable to results. The Fund's underweight allocation to the energy sector detracted from returns.

The Fund's longer-term performance remained favorable relative to that of the benchmark.

RETURN SUMMARY ENDING 9/30/07

	Third Quarter		Year-To-Date		1 Year Ending 9/30/07		3 Years Ending 9/30/07		5 Years Ending 9/30/07	
	Return	Rank	Return	Rank	Return	Rank	Return	Rank	Return	Rank
Washington Mutual Investors Fund	1.8 %	45	9.7 %	50	16.6 %	53	12.6 %	68	14.9 %	69
Russell 1000 Value Index	-0.2	66	6.0	78	14.5	72	15.2	32	18.1	30
S&P 500 Index	2.0	40	9.1	53	16.4	54	13.1	57	15.5	61

Investment Strategy

Washington Mutual Investors Fund seeks both income and growth of capital. The Fund invests in stocks that meet the fiduciary requirements for the investment of trust funds. This includes companies that have paid consistent dividends and excludes those that derive their primary revenues from alcohol or tobacco (this guideline was replaced by ERISA in 1974, but has been an investment principle for this fund since its 1952 inception). In particular, they seek companies that have paid dividends in at least nine of the last ten years.

Capital Research & Management (the American Funds family) provides investment services for this fund. Management looks for stocks with strong long-term prospects selling at low prices. The Fund may invest up to 5% of assets in securities of non-U.S. issuers.

Performance Commentary

The Washington Mutual Investors Fund outperformed the Russell 1000 Value Index by 2.0 percentage points during the third quarter although performance versus the S&P 500 was not as favorable. The Fund's large cap bias was a positive for the third quarter as small cap stocks were outperformed by their large cap peers. The Fund's overweight allocation to the energy, materials, and industrial sectors benefited performance. An underweight allocation to the consumer discretionary sector also helped performance as the sector suffered from a poor housing market and higher oil prices. Poor stock selection within the energy, materials, and health care sectors detracted from the Fund's return.

Over the one-year period, the Fund outperformed its benchmark. The Fund has trailed the value benchmark over all longer periods. Long-term performance versus the S&P 500 Index has been favorable over the one-year period but has lagged over the three- and five-year periods. The S&P 500 Index is the Fund's internal benchmark.

S&P 500 Index	2.0	40	9.1	53	16.4	54	13.1	57	15.5	61

Investment Strategy

The Vanguard Institutional Index Fund is designed to approximate the performance of the S&P 500 Stock Index. The fund holds a capitalization-weighted position in all 500 securities of the S&P 500 Stock Index.

Management uses S&P 500 Index futures to manage fund inflows and outflows.

Milwaukee County switched from the retail Vanguard 500 Index Fund to the Vanguard Institutional Index Fund in May 1999.

Performance Commentary

The Vanguard Institutional Index Fund approximated the return of the S&P 500 Index during the third quarter and over all longer-term periods shown above, as expected.

Russell 1000 Growth Index	4.2	24	12.7	31	19.4	35	12.2	73	13.8	81

Investment Approach

Capital Research and Management is the sub-advisor for the Growth Fund of America. Capital Research uses a multiple-counselor system in managing the portfolio's assets. The portfolio is divided into segments and the counselors manage their respective segments autonomously. The research analysts are responsible for making the investment decisions for one of the segments.

The Capital Research and Management Investment Committee is responsible for making sure the portfolio stays within its limits and adheres to its investment policies. The objective of the Fund is to provide long-term growth of capital by investing in a diversified portfolio of common stocks while using a growth-at-a-reasonable price strategy. The Fund may invest up to 15% of its assets in companies domiciled outside the U.S. This Fund is less volatile than most large cap growth funds.

Performance Commentary

The American Funds Growth Fund of America advanced 4.5% and outpaced the Russell 1000 Growth Index. The Fund's performance was positively impacted by the manager's overweight allocations to the information technology, energy, and materials sectors. Moreover, the manager's underweight allocation to the financial sector benefited results. From a stock selection perspective, the manager benefited from superior choices in the information technology sector, in particular communications equipment, and the materials sector where the manager gained on metals and mining stocks. From a country perspective, the manager's holdings within the United States, Canada, and Finland contributed most to relative results. As of mid-year the portfolio held less than 20% in non-U.S. securities.

Alternatively, the manager experienced difficulties in the industrials sector, especially among conglomerates. Also, the Fund's high cash percentage was a drag on performance. From a country perspective, the manager's holdings within Ireland, Germany, and Spain detracted from performance.

The Fund has outperformed both Indexes over the year-to-date and longer-term trailing periods shown above.

Performance Benchmark	1.5	48	9.2	53	17.0	50	14.0	46	16.5	48

Investment Strategy

The objective of the Vanguard Total Stock Market Index Fund is to approximate the return of the MSCI U.S. Broad Market Index. The Vanguard Total Stock Market Index Fund utilizes a sampling technique that approximates the industry weightings and market capitalizations of the MSCI U.S. Broad Market Index. The Fund will replicate the weightings of the largest stocks in the Index and invest in a representative sample for the remaining portion. Through computer modeling techniques, management intends to match the Index's characteristics, including sector weightings, yield, price ratios, and risk.

Performance Commentary

The Vanguard Total Stock Market Index Fund approximated the return of its benchmark during the third quarter and over all longer-term periods shown above, as expected. The Vanguard Total Stock Market Index Fund has provided participants with broad, low cost exposure to the U.S. equity market.

An explanation of the Performance Benchmark can be found in the Appendix.

Performance Benchmark	2.1	38	13.3	28	21.2	27	17.0	18	20.4	12

Investment Strategy

The J.P. Morgan Capital Growth Fund seeks long-term capital growth. Income is not an objective. The Fund invests in stocks of mid cap companies with market capitalizations of \$1 billion to \$5 billion. The current benchmark is the Russell MidCap Growth Index; however, the Fund's actual allocations can vary from those in the Index.

The Fund may invest up to 20% of assets in foreign stocks, although management has typically maintained a small foreign allocation.

Performance Commentary

The J.P. Morgan Capital Growth Fund outperformed its benchmark, the Russell MidCap Growth Index, by 3.6 percentage points during the third quarter. The Fund's top holding, VeriFone Holdings, Inc. was a large contributor to performance as was the top ten holding NVIDIA Corp. Stock selection within the consumer discretionary and information technology sectors was favorable to performance. Stock selection within the financial and consumer staples sectors detracted from performance.

The Fund has outperformed all longer time periods except for the five-year period. On an absolute basis, the fund has earned a strong 19.3% return, annualized over the last five years.

An explanation of the Performance Benchmark can be found in the Appendix.

Russell 2500 Index	-2.5	83	5.9	78	15.2	67	15.0	34	19.6	18

Investment Strategy

The Ariel Appreciation Fund seeks long-term capital appreciation, income is not an objective. Management invests in small- and mid-cap U.S. companies that meet environmentally responsible standards. By prospectus, the Fund may not purchase companies involved in the manufacturing of weapons, nuclear energy, or tobacco related products.

Management seeks stocks that are industry leaders or that occupy an industry niche and are selling at a discount to growth-rate projections. Although the Fund is relatively concentrated, management has generally avoided large stakes in growth industries such as technology and health care.

Performance Commentary

The Ariel Appreciation Fund fell 4.7% and underperformed the return of the Russell 2500 Index during the quarter. The biggest detractors to relative performance were companies with interests in the housing market. Some financial sector holdings and mortgage lender Countrywide Financial declined due to their exposure to subprime loans. In addition, carpet and floor covering provider Mohawk Industries suffered weak revenues due to the slow down in the housing market. Battery maker Energizer and scientific and technical instrument maker Thermo Fisher Scientific were individual holdings that benefited performance during the quarter. Energizer gained on a decrease in zinc prices while Thermo Fisher Scientific appreciated on strong earnings and revenue.

The Fund has struggled versus the Index over the year-to-date period due to weaknesses in its media and newspaper holdings. Two such holdings that have struggled were Gannett and McClatchy. The Fund's performance over the longer-term trailing periods has lagged the Index.

Small-Cap Index	-2.4	82	6.5	74	15.7	63	14.7	36	20.0	14

Investment Strategy

The Vanguard Small Cap Index Fund's strategy is designed to track the investment performance of the MSCI US 1750 Small Cap Index, which is comprised of the 1,750 smallest stocks out of the 2,500 largest stocks. Prior to May 17, 2003, the Fund replicated the Russell 2000 Index. Prior to June 30, 2003, the fund used a sampling technique to track the Russell 2000 Index.

Performance Commentary

The Fund matched the return of its benchmark during the third quarter of 2007. Slight tracking error existed over the longer-term periods shown above.

The Fund was moved from Admiral shares to the new Signal share class on 10/6/2007.

An explanation of the Performance Benchmark can be found in the Appendix.

LORD ABBETT DEVELOPING GROWTH

RETURN SUMMARY ENDING 9/30/07

	Third Quarter		Year-To-Date		1 Year Ending 9/30/07		3 Years Ending 9/30/07		5 Years Ending 9/30/07	
	Return	Rank	Return	Rank	Return	Rank	Return	Rank	Return	Rank
Lord Abnett Developing Growth Fund	9.8 %	4	30.6 %	1	44.8 %	1	22.4 %	3	20.7 %	11
Russell 2000 Growth Index	0.0	63	9.3	52	18.9	38	14.1	44	18.7	24

Investment Approach

Management of the Lord Abnett Developing Growth Fund employs a process of fundamental research to identify small cap companies that are entering a period of dramatic growth. Management begins by combining growth, balance sheet and financial statement factors to identify a promising universe of approximately 400 stocks. Portfolio managers and analysts then undertake fundamental and industry research, including company, customer and supplier visits, to select businesses with growth and earnings prospects. However, management sets valuation limits on purchase candidates, preferring to buy stocks at low valuations and then hold them throughout several growth stages.

The Fund tends to feature sector diversification, albeit with substantial exposure to growth industries. The portfolio holds approximately 119 micro- and small-cap stocks.

Performance Commentary

Lord Abnett had a strong quarter, outperforming the Russell 2000 Growth Index by 9.8 percentage points. The manager noted that strong stock selection within the consumer discretionary and technology sectors were the biggest contributors to performance. On an individual security basis, CROCS added the most to the portfolio. The manager also noted that technology security, Synaptics, and biopharmaceutical security, Onyx, added to the Fund's relative outperformance. The largest detractor for the fund, according to the manager, was stock selection within the materials sector.

The Fund has outperformed for all longer time periods shown above.

**RETURN SUMMARY
ENDING 9/30/07**

	Third Quarter		Year-To-Date		1 Year Ending 9/30/07		3 Years Ending 9/30/07		5 Years Ending 9/30/07	
	Return	Rank	Return	Rank	Return	Rank	Return	Rank	Return	Rank
Heartland Value Fund	-6.9 %	98	-1.2 %	98	12.2 %	83	12.8 %	64	20.8 %	10
Russell 2000 Value Index	-6.3	97	-2.7	99	6.1	98	12.5	69	18.7	24

Investment Approach

The Heartland Value Fund seeks long-term capital appreciation through investments in small or micro cap securities selected under disciplined, value-oriented criteria. Management seeks companies whose stock prices do not reflect what Heartland believes to be the companies' intrinsic or potential values. A company's stock may be undervalued because it is under-followed by Wall Street analysts, misunderstood by investors, temporarily oversold or out-of-favor as a result of investor overreaction to unexpected news or an emerging, undiscovered opportunity.

Heartland builds portfolios based on a bottom-up fundamental analysis of individual securities while avoiding over-concentration in a particular industry or industries. Heartland begins its search for investment ideas by performing a weekly computer screening of a universe of over 10,000 securities. The database is screened to find securities that have a market capitalization of \$750 million or less. The firm's analysts, using 10 value-based criteria referred to at Heartland as the "10 Point Grid", extensively research each security considered for purchase.

Performance Commentary

In the third quarter, the Heartland Value Fund returned -6.9%, underperforming its benchmark, the Russell 2000 Value Index, by 0.6 percentage points. Individual holdings InterDigital and Alaska Air Group were major detractors from performance. Poor stock selection within the information technology sector also detracted from performance. An underweight allocation to the financial sector helped as did an overweight to the materials sector which the manager noted benefited from a rise in commodities prices due to strong international economic performance.

The Fund has outperformed its benchmark for all of longer time periods shown above.

MSCI All Country World ex-U.S. Index	4.6	20	17.4	22	30.5	27	26.0	26	25.8	24

Investment Approach

Capital Research and Management is the sub-advisor for the EuroPacific Growth Fund. Capital Research uses a multiple-counselor system in managing the portfolio's assets. The portfolio is divided into segments and the counselors manage their respective segments autonomously. The research analysts are responsible for making the investment decisions for one of the segments.

The Capital Research and Management Investment Committee is responsible for making sure the portfolio stays within its limits and adheres to its investment policies. The objective of the fund is to provide long-term growth of capital by investing in a diversified portfolio of international stocks while using a growth-at-a-reasonable price strategy.

Performance Commentary

The EuroPacific Growth Fund outperformed the MSCI All Country World ex-U.S. Index by 70 basis points in the third quarter of 2007. An underweight allocation to and positive stock selection in the financial sector was positive as this sector once again struggled during the third quarter. Emerging market holdings, particularly in Korea and Brazil, continue to be beneficial to overall Fund performance as emerging markets posted returns well in excess of the developed markets during the third quarter on a broad basis (14.4% vs. 2.2%). In addition, the Fund's overweight allocation to India (+20% return) and resulting currency impact were positives for the quarter.

Over the trailing one-, three-, and five-year periods, the Fund has trailed its benchmark despite posting strong absolute gains. Much of the below benchmark performance is due to unfavorable currency effects born out of the Fund's underweight positions to Europe and the UK. High cash allocations have also been a drag on both short-term and longer term relative performance. The Fund has brought this cash position down over time to levels as low as 4%. As of quarter-end, the allocation stands at 7% of the fund.

MSCI All Country World ex-U.S. Index	4.6	20	17.4	22	30.5	27	26.0	26	25.8	24

Investment Strategy

The Vanguard Total International Stock Index seeks long-term growth of capital by offering exposure to over 1500 companies in more than 30 countries. The Fund invests in three Vanguard Index Funds: Vanguard European Stock Index Fund, Vanguard Pacific Stock Index Fund and Vanguard Emerging Markets Stock Index Fund. Each of these index funds attempts to track the appropriate MSCI Index. The three funds are managed by the Vanguard Quantitative Equity Group. The major difference between the fund and the Index is the fund's lack of exposure to Canada.

Performance Commentary

The Vanguard Total International Stock Index failed to track the return of its benchmark during the third quarter. No exposure to Canada accounted for some of the underperformance for longer time periods.

As the fund invests in three underlying Vanguard Index Funds, performance will not exactly track the return of the MSCI All Country World ex-U.S. Index; however, tracking has been reasonable over the periods shown.

APPENDIX II

Benchmark Descriptions

iMoney Net Money Fund Average - An index made up of the entire universe of taxable money market mutual funds. The index currently represents 1,228 funds, or approximately 99 percent of all money fund assets.

Custom Benchmark (Personal Strategy Balanced) - A mix of 51% DJ Wilshire 5000 Stock Index, 30% Lehman Brothers Aggregate Bond Index, 10% 90-Day Treasury Bills, and 9% MSCI EAFE Index.

Custom Benchmark (Personal Strategy Growth) - A mix of 65% DJ Wilshire 5000 Stock Index, 20% Lehman Brothers Aggregate Bond Index and 12% MSCI EAFE Index.

Custom Benchmark (Personal Strategy Income) - A mix of 34% DJ Wilshire 5000 Stock Index, 40% Lehman Brothers Aggregate Bond Index, 20% 90-Day Treasury Bills, and 6% MSCI EAFE Index.

Performance Benchmark (Vanguard Total Stock Market Index) - DJ Wilshire 5000 until 4/30/2005, the MSCI U.S. Broad Market Index going forward.

Performance Benchmark (Vanguard Small Cap Index) - Russell 2000 Index until 6/30/2003, the MSCI U.S. 1750 Small Cap Index going forward.

EnnisKnupp GIC Index - This benchmark index is an average of the 2-, 3-, 4- and 5-year GICs as surveyed by T.Rowe Price.

Lehman Brothers Aggregate Bond Index - A market value-weighted index consisting of government bonds, SEC-registered corporate bonds and mortgage-related and asset-backed securities with at least one year to maturity and an outstanding par value of \$150 million or greater. This index is a broad measure of the performance of the investment grade U.S. fixed income market.

Lehman Brothers Corporate Bond Index - A market value-weighted index consisting of government bonds and SEC-registered corporate bonds with at least one year to maturity and an outstanding par value of \$150 million or greater.

MSCI All Country World Ex-U.S. Free Index - A capitalization-weighted index of stocks representing 48 developed and emerging country stock markets, excluding the U.S. market.

MSCI U.S. 1750 Small Cap Index - An index representing the universe of small capitalization companies in the U.S. equity market. This index targets for inclusion 1,750 companies and represents approximately 12% of the capitalization of the U.S. equity market.

Performance Benchmark (J.P. Morgan Capital Growth) - Currently the Russell Mid Cap Growth Index. Prior to January 1, 2002, the benchmark was the S&P 400 Midcap Index effective June 30, 1999, and the Russell 2500 Index prior to that.

60/40 Benchmark - A mix of 60% DJ Wilshire 5000 Stock Index and 40% Lehman Brothers Aggregate Bond Index.

Benchmark Descriptions

S&P Midcap 400 Stock Index - A capitalization-weighted index representing stocks chosen by Standard & Poor's, Inc. for their size, liquidity, stability and industry group representation. None of the stocks included overlap with those in the S&P 500 or the S&P SmallCap 600. Some stocks included in the Index are larger than those in the S&P 500 and some are smaller than those in the S&P Small Cap 600.

S&P 500 Stock Index - A capitalization-weighted index representing stocks chosen by Standard & Poor's, Inc. for their size, liquidity, stability and industry group representation. The companies in the S&P 500 Index are generally among the largest in their industries. Currently the Index comprises industrial, utility, financial and transportation stocks.

Russell 1000 Index - A capitalization-weighted index of the 1,000 largest publicly traded U.S. stocks by capitalization.

Russell 1000 Value Index - An Index that measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower I/B/E/S growth forecasts.

Russell 1000 Growth Index - An Index that measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher I/B/E/S growth forecasts.

Russell 2500 Index - A capitalization-weighted, small-cap stock index representing the performance of 2,500 domestic stocks. This Index represents approximately 22% of the domestic market. Its median market capitalization is approximately \$733 million.

Russell 2000 Stock Index - A capitalization-weighted index of the smallest 2,000 stocks in the Russell 3000 Index. The Index excludes the largest- and smallest-capitalization issues in the domestic stock market.

Russell 2000 Value Stock Index - A capitalization-weighted index representing those companies within the Russell 2000 Index with lower price-to-book ratios and lower I/B/E/S earnings growth forecasts.

Russell 2000 Growth Stock Index - A capitalization-weighted index representing those companies within the Russell 2000 Index with higher price-to-book ratios and higher I/B/E/S earnings growth forecasts.

DJ Wilshire 5000 Stock Index - A capitalization-weighted stock index representing all domestic common stocks traded regularly on the organized exchanges. The Index is the broadest measure of the aggregate domestic stock market.

APPENDIX II

Rank Descriptions

U.S. Equity Ranks - A broad Morningstar universe of 2,611 U.S. stock mutual funds.

Fixed Income Ranks - A broad Morningstar universe of 730 fixed income mutual funds.

Non-U.S. Equity Ranks - A non-U.S. equity universe calculated by Mellon Analytical Solutions. The universe includes 78 non-U.S. stock managers with an aggregate market value of \$306.8 billion.
