## Commissioner of Health Statement Concerning Infant Death

The City of Milwaukee Health Department was deeply saddened to learn today of another infant death that may be related to unsafe sleep practice. Deaths caused by unsafe sleep are preventable, and we will continue our efforts to increase awareness on the dangers associated with an unsafe sleep environment. The safest place for babies to sleep is in their own crib or bassinet, on their backs, with no pillows, bumper pads, blankets, or toys. The Department is working closely with all our key community partners to promote this safe sleep message.
