**MILWAUKEE COUNTY EMS
ADMINISTRATIVE POLICY
ALS ACTIVITY TRACKING**

Approved by: Patricia Hasbeck, MSN, RN
Reference:
Page 1 of 1

Policy: Milwaukee County EMS will keep a current log of active EMTs contracted to provide ALS services and/or procedures within the system. This will include all paramedics and EMT-Basic IV Technicians. The log will be maintained as part of the Milwaukee County EMS Oracle database.

Each EMT will be assigned a unique identifier designating their system number and scope of practice. This identifier will be used to track system activity and dates of changes.

Each EMT will be assigned a practice privilege by the Medical Director, indicating how the EMT may practice on a 911 emergency medical dispatch.

The employing fire department will notify the Program Director of MC EMS of any leave of absence over 90 days due to medical or other leave, or of any other change in an EMT's practice status.

- The medical director will review the practice status and privilege of EMTs not assigned to an EMS unit for a period of 90 days and make changes to either, as deemed necessary.
- EMTs returning to active duty after 90 days must be reintegrated into the system as outlined in the Reinstatement of Practice Privileges policy.

An EMT's system activity will be taken into account, along with other criteria, when determining eligibility for County-supported continuing education and/or distance learning.

The Medical Director reserves the right to make the final determination of an EMT's practice status and practice privilege.
