- Off-Street Trail
- On-Street Trail Connection
- Oak Leaf Paved Trail
- Oak Leaf Municipal Street
- Oak Leaf Parkway Drive
- Mountain Bike Trail

On Street Bikeways

- Bike Route
- Preferred Street
- Bike Lane

Avoid the "Right Hook"

Position yourself closer to the center of the right lane when traveling straight through an intersection

Intersections are the most dangerous spot on the road. Watch for oncoming traffic that may turn left across your path as well as cross traffic that may not stop.

Look over your shoulder each time before signalling or changing lanes

To cross an intersection move one lane at a time until you are in the lane farthest to the right that allows a legal turn to where you are going.

Avoid the "Door Zone"

Ride three feet away from parked cars

Ride Predictably

Ride in a straight line. Do not weave in and out of parked cars.

Watch for drivers in parked cars who might open their doors without looking.

No Wrong Way Riding

Never ride against traffic. It is very dangerous and illegal.

Avoid the "Left Hook"

Watch out for cars turning left across your path when riding straight through intersections

Cyclists must stop at all signals and stop signs

Don't Ride on the Sidewalk

It is dangerous and illegal in the City of Milwaukee unless you are 10 years old or younger

Streets like the one to the right striped with bike lanes provide a "bikes only" lane for cyclists identified with pavement markings as well as signs

Streets like the one to the right signed as "Bike Routes" typically have outside curb lanes wide enough for bikes and cars to travel safely side by side
